

The Star Series is about learning, having fun and developing good habits at an early age. Created by brain-based learning experts from the USA and delivered by world-class professional trainers, the Star Series program will give your students the personal and academic skills to be successful.

Designed for students  
**AGE 9 ~ 12**

## Friends FUN Learning

Blue Star uses a series of team challenges to explore the importance of working with others, listening, sharing resources and supporting. Students will learn the key steps to solving problems and how they can use their personal strengths to be successful in school and at home.

### Learning Theme #1:

**Teamwork** The ability to work well with others is an important skill to develop. Blue Star is full of team-building games and each one has a specific purpose.

*"I like working in a team. When I help other people, good things happen for me too."* Navin, Age 10

### Learning Theme #2:

## Problem Solving

Learning how to solve problems builds confidence and ensures success in many environments. Blue Star challenges the students to think differently, assemble resources and work intelligently to solve problems.

*"I used to worry when I had problems. Now, I know to be creative and even have fun with it."* Mandy, Age 10
