

The STAR Series

green

Designed for students
AGE 9 ~ 12

The Star Series is about learning, having fun and developing good habits at an early age. Created by brain-based learning experts from the USA and delivered by world-class professional trainers, the Star Series program will give your students the personal and academic skills to be successful.

Green Star is all about getting results. Students will face several challenges that will cause them to examine how they respond to making mistakes, how they work through frustration and how they use their resources to reach their goals. Students will learn a simple system for gathering valuable learning from any experience that they have.

Learning Theme #1: Commitment

Finish what you start. Do what you say you're going to do. It's that simple. Students will learn valuable skills for keeping their agreements, managing their time and staying motivated. These are great habits to instill at an early age and will help them stand out later in life.

Learning Theme #2: Goal Setting

It's a fact... people who have goals and write them down are 74% more likely to achieve them. Green Star will give students several tools for brainstorming their goals, creating action plans and building a daily routine that will help them to become high-achievers.

"I have a plan for the whole school year. That's cool." Tim, Age 12

RM 600.00 for 2 days (Drop Off: 9am, Pick Up: 3pm) inclusive of lunch.
***10% early bird discounts available.**
